Space is certainly a must for homeowners who build or remodel their kitchens to suit their personal needs

[Dix Residence]

When Richard and Elaine Dix of Delafield decided to remodel their kitchen it became a collaborative effort between JP Kitchen Design Studio of Oconomowoc and the Dixes, who own their own business, Dix Remodeling and Design. "We really enjoyed working with JP Designs." The couple designed the kitchen they wanted, and Laurie Peirick of JP Kitchen Design Studio fine tuned the plans by helping with the cabinets, etc. The first step was to flip the layout of the kitchen from one side of the room to the other and install a large window in order to take advantage of the view of Lapham Peak State Park.

"This is a real working kitchen," Elaine explains, who is a personal chef for a family member. The couple also entertain frequently so the layout of the space was important.
